

Introducing *FUSED*™ - the world's healthiest coffee!
infused with seed oils and an exotic ancient Chinese herb

For 30 years, Dr. Weeks has been urging people to drink less coffee and more good quality water. That is a tough sell because the caffeine in coffee is addictive.! So, if you already consume caffeinated drinks on a daily basis (coffee, tea, soda pop, hot chocolate) then Dr. Weeks recommends switching to *FUSED*™ - the world's healthiest coffee. You will notice the coffee is not acidic (no more heart burn!) and you won't need decaf coffee because *FUSED*™ is infused with medicinal plant ingredients which block the caffeine

FUSED™ is the healthiest coffee on earth for these reasons:

1) *FUSED*™ is made from **whole, organic non-GMO** artisan coffee beans which, after the roasting process are infused with **4 organic anti-inflammatory seed oils: black cumin seed oil, grape seed oil, pomegranate seed oil and grapefruit seed oil**. In addition to the powerful seed oils, we add the **immune enhancing *Ganoderma Lucidium***, also known as the red reishi mushroom which was, for 4000 years, considered the most valuable medicinal mushroom in China. The "Emperor's Herb" contains nutrients that can help the human body to maintain its health, or improve its level of health if there are problems. It was a stroke of genius to add this tasteless powdered healing mushroom to delicious coffee and create *FUSED*™

2) Coffee is the most pesticided food Americans eat because most coffee is grown in pesticided soil, sprayed with pesticides and because coffee is an oily bean it retains the toxins releasing them in your hot brewed morning drink. STOP DRINKING pesticide-drenched coffee. **DRINK ORGANIC COFFEE** - the healthiest of which is *FUSED*™

3) Coffee is a delivery system for unhealthy sweets:

Coffee is a health food being, as it is, rich in vitamins and anti-oxidants and bitters which assist digestion until we add "candy" (cream and sugar, or worse, trans-fatty acid non-dairy creamer or worse still, Italian soda rich in sugar!) Coffee is a delivery system for sweeteners and dairy. Starbucks sells more dairy product than it does coffee! Our Irish friends know that coffee is a delivery system. Ever enjoyed Irish coffee?

Cost \$0.70 cents a cup. Satisfaction guaranteed or your money back!
